International Telecommunication Union

Administration of communication of the Republic of Kazakhstan having considered request of the International Telecommunication Union of November 22, 2013 № CL-13/168 concerning submission of information on measures taken or have to be accepted by the governments in connection with various questions of the international state policy regarding the Internet, informs the following.

Today according to the current legislation of the Republic of Kazakhstan the Internet resource is defined as an electronic information resource, technology of its maintenance (or) use, functioning in an open information and communication network, as well as organizational structure, providing information interaction.

In accordance with the Law of the Republic of Kazakhstan "On mass media" Internet resource is related to the mass media, and information placed on it, is production of mass media.

Also, according to the above Law the ban on distribution media is allowed only on the basis of the judgment which have entered validity.

Administration of communication of the Republic of Kazakhstan within the powers exercises control of execution of judgments concerning an Internet resource.

Besides, rendering services of Internet access are carried out by operators according to the Law "On Communications" of the Republic of Kazakhstan, Rules of rendering communication services (Resolution of the Government of the Republic of Kazakhstan of December 30, 2011 No. 1718), Rules for Interconnection and interoperability of telecommunications networks, including transmission of traffic and order settlements (Resolution of the Government of the Republic of Kazakhstan of December 30, 2011 No. 1694).

Vice-minister

S. Sarsenov
