

How do humans read emotions?

Emotion sensing is highly complex. Humans interpret emotions by combining multiple channels:

55%

Facial expressions and gestures

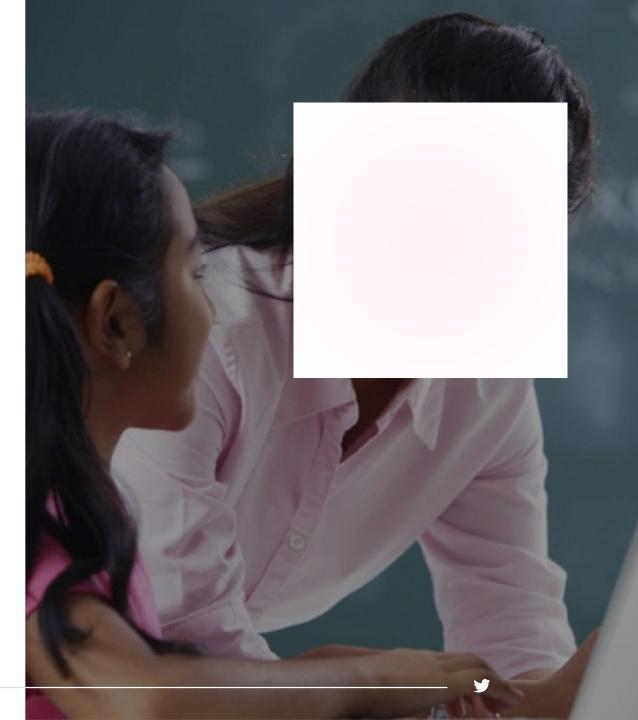

38%

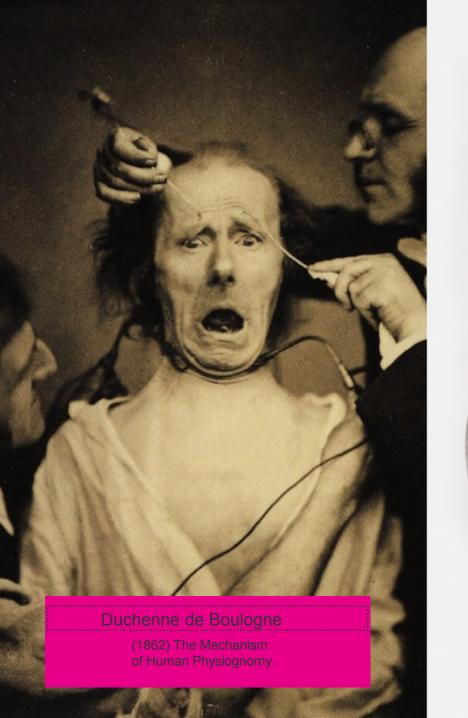

How the words are said

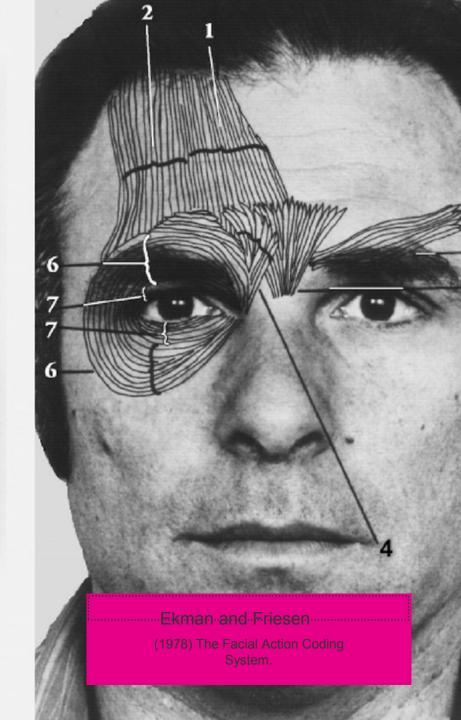

7%

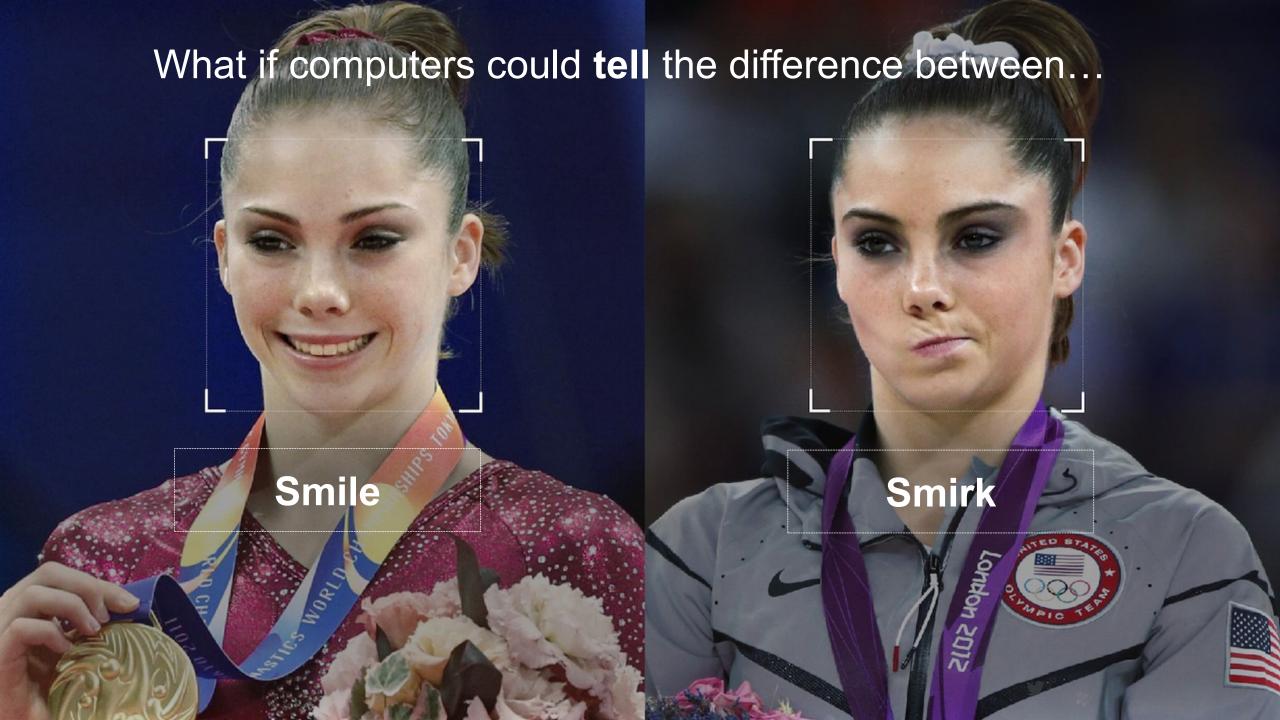

The actual words

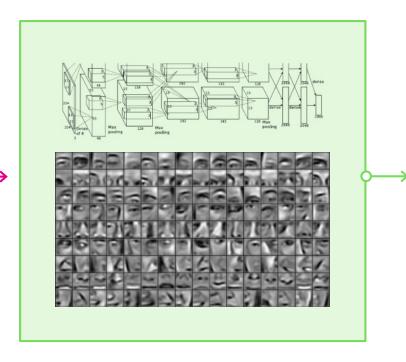

Emotion Al platform built on deep learning

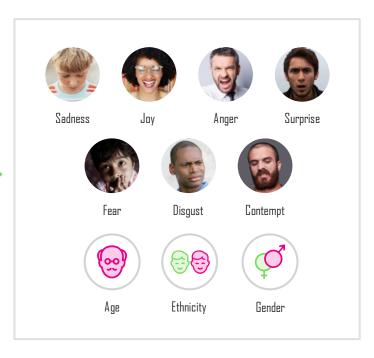

Input:

Labeled and unlabeled videos (+voice) data. Meta data. Latest training used 1M+ images.

Deep Neural Networks

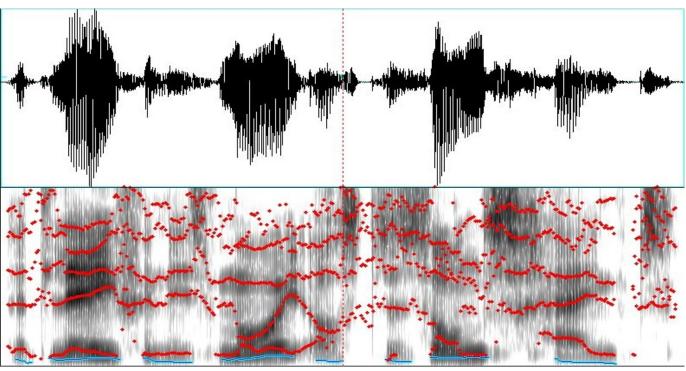

Output:

23 Facial expressions
7 Emotions
Valence, Engagement, Attention, Age,
Ethnicity, Gender

Emotion from **Speech**

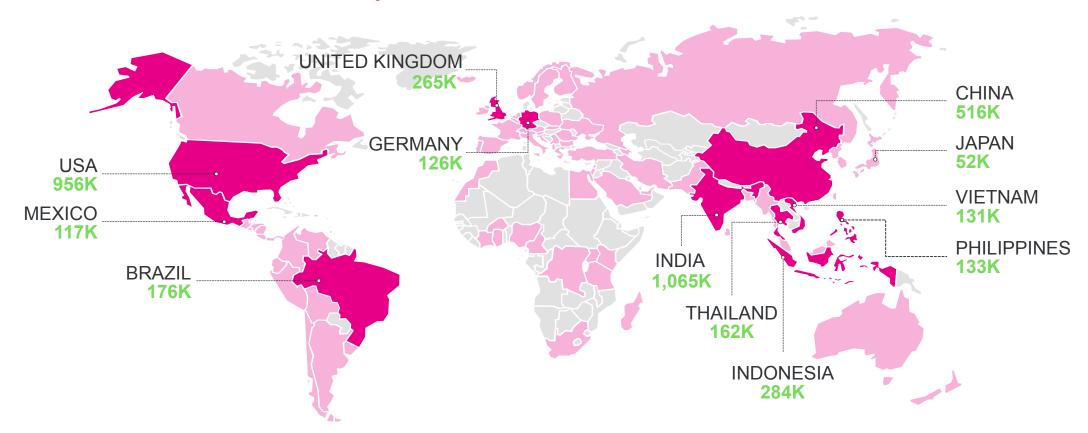

World's largest emotion data repository

87 countries, 6M faces analyzed, 2B facial frames Includes people emoting on device, mobile phone and while driving
